

# Jordan Marcon

## Creative Developer

## About Me

---

I am a creative, reliable and curious developer. If I'm not working you can easily find me taking an online course, playing guitar or walking my dog around. Honesty mean a lot for me and it's always the kind of relation I focus first, pro or personal. I'm open-minded and respectful. And yeah, I love to learn new things! 🙌

I speak French, English and Portuguese.

## Skills

---

**WebGL** (ThreeJS / OGL)

**Animations** (GSAP, vanilla or whatever is needed)

**Shaders** (GLSL)

**Maths** (for coding)

**3D** (Blender - noob level, but I'll improve)

**Javascript** (Vanilla - VueJS - React - NuxtJS - NextJS)

## Experience

---

### Freelance

I mainly worked with Reassurez-moi, an insurance broker company based in Paris, for almost 4 years (fully remote). I was a Full Stack Developer, the stack was VueJS and Symfony. For the last year, I was more focusing on the front end part.

I mostly work on their health comparator : getting offers from insurance partners API, allowing people to directly subscribe through the site with signing, forms, etc.

### Side Projects

- Development of a senior Creative Designer's portfolio : <https://louisetamiazzo.com>
- Landing Page : <https://godz.pt>
- Currently working on 2 side projects involving WebGL, for a creative contest
- **Practicing a lot WebGL stuff and shaders** 📖

## School / Formations

---

- 2016-2017 : Diploma in Multimedia Project Manager - Development at OpenClassrooms
- [Three.js Journey](#) by Bruno Simon
- Some courses, WebGL oriented, on [Awwwards Academy](#)
- A lot of tutorials, articles, case studies and live coding 🧑‍💻

Previously :

- 2011-2012 Baccalaureate in Sciences and Management Technologies
- 2012-2014 : BTEC Higher National Diploma in Management of the Commercial Units
